# The CIHEAM Montpellier

for agriculture and rural development in the Mediterranean

2022 / 2023

Dear Partner,

For over 50 years, the CIHEAM Montpellier has contributed to the production of skills and the construction of knowledge for executives in the public and private sector, in the fields of **agriculture, food and sustainable rural development** in the **Mediterranean area**. The institute implements its missions of higher education, research and cooperation for the development in partnership with the numerous members of its Euro-Mediterranean network.

Since its creation in 1962, the CIHEAM Montpellier has trained and supervised more than 5000 students. Currently, most of them have high strategic responsibilities in their country and in various international organizations. The Institute gathers **an international corpus of** renowned, permanent or temporary, **teachers and scientists**.

Within a rapidly changing Mediterranean context, the offer of Master programmes at the CIHEAM Montpellier has been developed in conformity with the **Bologna process** and the **ISO 9001** quality standards. Renewed in 2021, this offer of Master programmes is **accredited** by the French Ministries of Higher Education and Agriculture. Our Master diplomas are awarded jointly with **the universities of Montpellier** and **the Institut Agro-Montpellier | Montpellier SupAgro**.

As every year, we are counting on you to make our training offer ever more widely known by distributing the attached leaflet among your colleagues and networks. In so doing, you will facilitate access to training for the people who will forge our future, whether they are destined to work in administration, public or private sector companies, or within civil society.

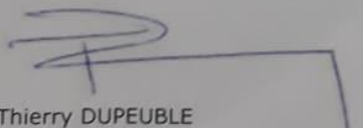

**The scholarship system of the Institute** enables more students from CIHEAM countries to benefit from the support of accommodation and training costs. Students coming from other countries may also be admitted: the school fees and the living expenses have to be covered by external scholarships or borne by the students themselves.

As usual, an **intensive training session in French language** is organized during the summer (from mid-July) to improve the non-French-speaking students' level with also the possibility for the students coming from CIHEAM member countries to benefit from a scholarship during the training period.

In the face of the COVID-19 pandemic and in view of the sanitary measures implemented to counter it, the CIHEAM Montpellier has invested in and adapted its teaching methods to ensure the continuity of its training courses while ensuring maximum health security.

Thank you very much for your support in this new 2022/2023 advertising campaign. I remain at your disposal for any further information that you may require.

Yours faithfully

Thierry DUPEUBLE  
Director of the CIHEAM Montpellier
