

**Our University's Quality Assurance Policy;**

1. To adopt a sustainable approach by managing quality processes in alignment with the institution's mission, vision, and core values,
2. To carry out activities focused on planning, implementation, monitoring, and improvement with a holistic approach to achieving strategic goals,
3. To create added value by increasing capacity and strengthening collaborations in R&D and product development activities,
4. To strengthen the facilities and resources to support education and training processes, to enhance the competence of teaching staff, and to bring these elements together to train individuals who are preferred in their field,
5. To conduct sustainability activities for the benefit of society and the environment and to create an impact in this area,
6. To enhance institutional competitiveness and reputation at national and international levels,
7. To strengthen the active participation, satisfaction, and sense of belonging of stakeholders,
8. To promote a quality-focused institutional culture,
9. To strengthen and manage institutional resources effectively,
10. To support institutional accreditation and program accreditation processes to raise quality standards.

It encompasses ensuring and conducting the institutional quality system under the slogan 'Forward Alltogether'
