

Quality Assurance Policy of the Center

Quality Assurance Policy In line with the quality, entrepreneurship and innovation mission of our university and the goals of becoming the best university in the region and becoming a strong scientific institution of our country and the world, our Center;

To prepare application and research projects based on universal scientific foundations and humane approaches related to the development, mental-emotional-social needs and education of gifted individuals in our country,

In cooperation with internal and external stakeholders, to develop psychological counseling and guidance approaches that support the physical, mental, emotional and social development of gifted individuals holistically, which are applicable in the conditions of our country, and to prepare educational programs,

To carry out studies in the direction of spreading determination, development, psychological support and educational activities for the gifted to the gifted throughout the country and in every period of development,

To organize joint studies with public or private institutions and organizations in Turkey and abroad that are engaged in research on issues related to the activity area of the center, to prepare application and research projects, to participate in ongoing studies, to implement these developed projects and/or to follow up these applications,

has adopted a principle.
